<sup>2</sup>Continue to refer to the automated decision system for guidance on when General Living and Entertainment Expenses (GLEE) commentary is required. Where pipeline treatment applies (scenario 1) and we are approving based on an existing calculator, the calculator can be used to determine whether GLEE commentary is required.

<sup>3</sup>Applications with a change to a negative servicing position due to a serviceability calculation change (e.g. HEM change, interest rate change) can be approved without a serviceability waiver being recorded, provided there is no change in credit critical attributes.

<sup>4</sup>'Existing' refers to policy applicable before the effective date of this pipeline treatment document. 'New' refers to policy applicable on or after the effective date of this pipeline treatment document.
